

Huang Rui

Software Development Engineer

Shenzhen | +86 138-0000-2005 | huang.rui@campusmail.com

Professional Summary

- Generalist engineering candidate with solid systems fundamentals, strong debugging habits and device-software exposure.
- Interested in performance-sensitive product development and disciplined engineering collaboration.

Education

- South China University, B.Eng. Software Engineering, 2022-2026
- Core modules: Operating Systems, Computer Architecture, Network Protocols, C++ Programming

Experience

- Embedded Software Intern, 2025. Worked on serial communication and fault log analysis.
- Robotics Club Developer. Maintained device control programs and automated test reports.

Projects

- Device Diagnostic Tool: built C++ parsers and Java log export utilities for QA teams.
- Protocol Simulation Lab: implemented socket communication and packet replay utilities.

Skills

C++ | Java | TCP/IP | Operating Systems | Multithreading | Git | Debugging | Documentation
